

HOW TO...

MAKE YOUR OWN INSECT TRAP

YOU'LL NEED

- A small empty yogurt container
- A spoon
- A piece of fruit

WHERE

- Anywhere you can dig a yogurt cup-sized hole

WHAT TO DO

- Go outside and dig a hole, place the yogurt cup in
- Pack soil around it and put some small rocks around
- Put a piece of fruit down into the cup
- Place a flat stone or a large leaf on top as a cover
- Leave the trap for a few hours, or overnight
- Go and see how many insects you've caught

Hint: It's easier to do this in parks, in the woods, in the garden or in the backyard.
Let us know: Are there any that have wings? How many legs do they have? Maybe you know what they are?
